

## Loudoun County

2016 - 2020

# Potential for Safety Improvement (PSI) for Fatal and Injury Crashes

With US Route 15 Focus Segment Comparison

What is Potential for Safety Improvement?

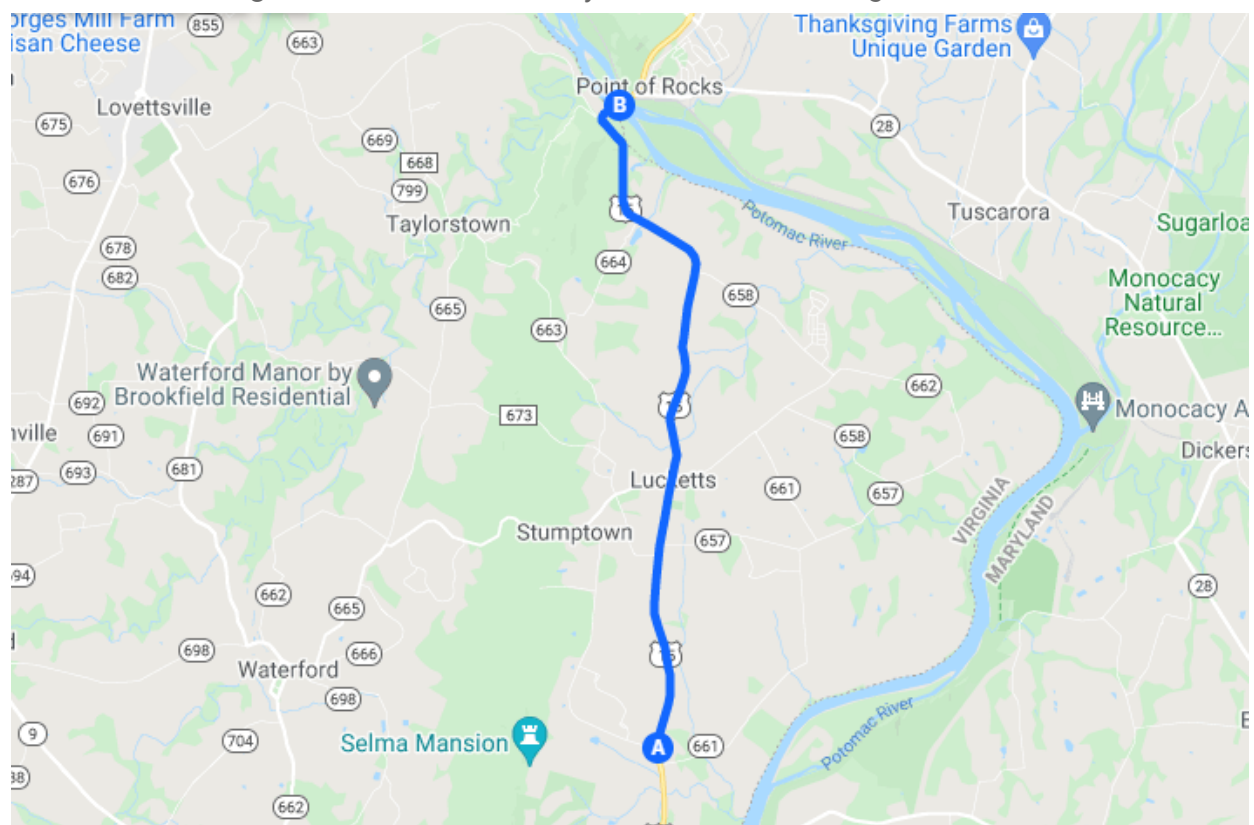

***A safety performance measure based on comparison of the experienced crash frequency and the predicted crash frequency for a particular segment or intersection. The value can be calculated for total crashes or for targeted crashes such as fatalities and injuries. PSI values less than zero indicate less than expected crashes and values greater than zero indicated higher than expected crashes.***

The following safety data was compiled at the request of E. Scott Kasprovicz - Virginia Commonwealth Transportation Board - by the Virginia Office of Intermodal Planning and Investment (OIPi)

## **Route 15 Focus Segment** - Montesor to Maryland State Line - 9 segments - 7.27 mi

## **Route 15 Focus Segment - Highest Fatal and Injury PSI Rankings - Segments and Intersections**

Highest ranking segment of Route 15 is *ranked 61st in the county*

Highest ranking intersection along Route 15 is *ranked 113th in the county*
